

Massachusetts Municipal Revenue Analysis – FY2024

Municipal Revenue Breakdown 2024

This chart shows how each municipality’s revenue is split across key sources like taxes, state aid, and service charges. It highlights differences in fiscal structure and helps identify patterns in local financial resilience.

Top 10 Municipalities by State Revenue Dependency (%)

These 10 towns receive the highest share of their total revenue from state aid. This makes them more vulnerable to state-level policy or funding changes.

Total Revenue by Municipality

This chart shows total general fund revenue by municipality, highlighting the fiscal size of each town and enabling quick comparisons for strategic and regional insights.

State vs Local Revenue % Comparison

This chart compares how much revenue each town receives from local vs. state sources, highlighting differences in financial independence and state funding reliance.

Revenue Category Totals (All Towns Combined)

Key Takeaways:

- Taxes account for nearly 70% of all municipal revenue
- Lawrence and Springfield show the highest state aid dependency (60%+)
- Most towns are primarily funded through local sources

State vs Local Revenue % Comparison

● Sum of State Dependency % ● Sum of Local Revenue %

This chart compares how much revenue each town receives from local vs. state sources, highlighting differences in financial independence and state funding reliance.

- *Taxes are the largest source of revenue for all towns, making up nearly 70% of the total.*
- *State revenue follows as the second major contributor, accounting for over one-fifth of total collections.*
- *Service charges, licenses and permits, and miscellaneous sources each contribute small but meaningful portions.*
- *Transfers, fines, and other financing sources make up a minimal share of the overall revenue.*
- *The data reflects a strong dependence on local tax revenue, with limited diversification across other income streams.*
